

COURSE OUTLINE

Course Code: AZ-305T00

Course Name: Designing Microsoft Azure Infrastructure Solutions

DURATION	SKILL LEVEL	DELIVERY METHOD	TRAINING CREDITS	TECHNOLOGY
4 days	Advanced	VILT/ILT	N/A	Azure

Course Overview

This course teaches Azure Solution Architects how to design infrastructure solutions. Course topics cover governance, compute, application architecture, storage, data integration, authentication, networks, business continuity, and migrations. The course combines lecture with case studies to demonstrate basic architect design principles.

Target Audience

Successful students have experience and knowledge in IT operations, including networking, virtualization, identity, security, business continuity, disaster recovery, data platforms, and governance. Students also have experience designing and architecting solutions.

Job role:

Solution Architect

Exam Requirements

AZ-305

Prerequisites

- Conceptual knowledge of governance policies, resource organization, and subscription management.
- Working experience with organizing resources, applying governance policies, and enforcing compliance requirements.

Topics

Module 1

Design governance

- 32 min
- Module
- 11 Units

Feedback

Advanced

Solution Architect

Azure Policy

Azure Resource Manager

Azure Architects design and recommend governance solutions.

Learning objectives

In this module, you learn how to:

- Design for governance.
- Design for management groups.
- Design for Azure subscriptions.
- Design for resource groups.
- Design for resource tagging.
- Design for Azure Policy.
- Design for Azure role-based access control.
- Design for Azure landing zones.

Module 2:

Design an Azure compute solution

- 41 min
 - Module
 - 11 Units
-

Feedback

Advanced

Solution Architect

Azure App Service

Azure Batch

Azure Container Instances

Azure Virtual Machines

Azure Architects design and recommend Azure compute solutions.

Learning objectives

In this module, you learn how to:

- Choose an Azure compute service.
- Design for Azure Virtual Machines solutions.
- Design for Azure Batch solutions.
- Design for Azure App Service solutions.
- Design for Azure Container Instances solutions.
- Design for Azure Kubernetes Service solutions.
- Design for Azure Functions solutions.
- Design for Azure Logic Apps solutions.

Module 3:

Design a data storage solution for non-relational data

- 44 min
- Module
- 10 Units

Feedback

Advanced

Solution Architect

Azure Blob Storage

Azure Disk Storage

Azure Storage

Azure Storage Accounts

Azure Architects design and recommend non-relational data storage solutions.

Learning objectives

In this module, you learn how to:

- Design for data storage.
-

- Design for Azure storage accounts.
- Design for Azure blob storage.
- Design for data redundancy.
- Design for Azure files.
- Design an Azure disk solution.
- Design for storage security

Module 4:

Design a data storage solution for relational data

- 41 min
- Module
- 11 Units

Feedback

Advanced

Solution Architect

Azure Cosmos DB

Azure SQL Database

Azure SQL Edge

Azure SQL Managed Instance

SQL Server on Azure Virtual Machines

Azure SQL Server on Virtual Machines

Azure Table Storage

SQL Server

Azure Architects design and recommend relational data storage solutions.

Learning objectives

In this module, you learn how to:

- Design for Azure SQL Database.
 - Design for Azure SQL Managed Instance.
 - Design for SQL Server on Azure Virtual Machines.
 - Recommend a solution for database scalability.
 - Recommend a solution for database availability.
 - Design protection for data at rest, data in transmission, and data in use.
 - Design for Azure SQL Edge.
 - Design for Azure Cosmos DB.
 - Design for Azure Table Storage.
-

Module 5:

Design data integration

- 34 min
- Module
- 9 Units

Feedback

Advanced

Solution Architect

Azure

Azure Blob Storage

Azure Data Factory

Azure Data Lake

Azure Databricks

Azure Stream Analytics

Azure Synapse Analytics

Azure Architects design and recommend data integration solutions.

Learning objectives

In this module, you learn how to:

- Design a data integration solution with Azure Data Factory.
- Design a data integration solution with Azure Data Lake.
- Design a data integration and analytics solution with Azure Databricks.
- Design a data integration and analytics solution with Azure Synapse Analytics.
- Design strategies for hot, warm, and cold data paths.
- Design an Azure Stream Analytics solution for data analysis.

Module 6:

Design an application architecture

- 35 min
- Module
- 11 Units

Feedback

Advanced

Solution Architect

Azure App Configuration

Azure Cache for Redis

Azure Event Grid

Azure Event Hubs

Azure Architects design and recommend application architectures.

Learning objectives

In this module, you learn how to:

- Describe message and event scenarios.
- Design a messaging solution.
- Design an Azure Event Hubs messaging solution.
- Design an event-driven solution.
- Design an automated app deployment solution.
- Design API integration.
- Design an application configuration management solution.
- Design a caching solution.

Module 7:

Design authentication and authorization solutions

- 48 min
- Module
- 13 Units

Feedback

Advanced

Solution Architect

Microsoft Entra ID

Azure Role-based access control

Azure Architects design and recommend authentication and authorization solutions.

Learning objectives

In this module, you learn how to:

- Design for identity and access management.
 - Design for Microsoft Entra ID.
 - Design for Microsoft Entra business-to-business (B2B).
 - Design for Azure Active Directory B2C (business-to-customer).
 - Design for conditional access.
 - Design for identity protection.
 - Design for access reviews.
-

- Design for managed identities.
- Design for service principals for applications.
- Design for Azure Key Vault.

Module 8:

Design a solution to log and monitor Azure resources

- 23 min
- Module
- 7 Units

Feedback

Advanced

Solution Architect

Azure

Azure Data Explorer

Azure Log Analytics

Azure Monitor

Azure Architects design and recommend logging and monitoring solutions.

Learning objectives

In this module, you learn how to:

- Design for Azure Monitor data sources
- Design for Azure Monitor Logs (Log Analytics) workspaces
- Design for Azure Workbooks and Azure insights
- Design for Azure Data Explorer

Module 9:

Design network solutions

- 34 min
- Module
- 10 Units

Feedback

Advanced

Solution Architect

Azure

Azure Architects design and recommend network solutions.

Learning objectives

In this module, you learn how to:

- Recommend a network architecture solution based on workload requirements
- Design for on-premises connectivity to Azure Virtual Network
- Design for Azure network connectivity services
- Design for application delivery services
- Design for application protection services

Module 10:

Design a solution for backup and disaster recovery

- 30 min
- Module
- 10 Units

Feedback

Advanced

Solution Architect

Azure Backup

Azure Site Recovery

Learn how to select appropriate backup solutions and disaster recovery solutions for Azure workloads.

Learning objectives

In this module, you'll learn how to:

- Design for backup and recovery.
- Design for Azure Backup.
- Design for Azure blob backup and recovery.
- Design for Azure Files backup and recovery.
- Design for Azure virtual machine backup and recovery.
- Design for Azure SQL backup and recovery.
- Design for Azure Site Recovery.

Module 11

Design migrations

- 40 min
- Module
- 10 Units

Feedback

Advanced

Solution Architect

Azure Data Box Family

Azure Database Migration service

Azure Migrate

Azure Architects design and recommend migration solutions.

Learning objectives

In this module, you learn how to:

- Evaluate migration with the Microsoft Cloud Adoption Framework for Azure
- Describe the Azure Migration and Modernization Program (Azure Migration Framework)
- Assess your on-premises workloads
- Select a migration tool
- Migrate your databases
- Select an online storage migration tool
- Migrate offline data

Module 12

Build great solutions with the Microsoft Azure Well-Architected Framework

- 7 hr 13 min
- Learning Path
- 6 Modules

Beginner

Solution Architect

Azure

Azure Storage

Azure SQL Database

Azure Cosmos DB

Azure Cost Management

Azure Advisor

Azure Monitor

Azure Content Delivery Network

Microsoft Entra ID

Azure Virtual Machines

Azure App Service

Azure Resource Manager

Azure Site Recovery

Azure Backup

Azure ExpressRoute

Learn how to design and build secure, scalable, high-performing solutions in Azure using the pillars of the Microsoft Azure Well-Architected Framework.

This learning path helps prepare you for [Exam AZ-305: Designing Microsoft Azure Infrastructure Solutions](#).

Module 13

Accelerate cloud adoption with the Microsoft Cloud Adoption Framework for Azure

- 10 hr 36 min
- Learning Path
- 9 Modules

Beginner

Administrator

Developer

Solution Architect

Auditor

Business Analyst

Business Owner

Data Engineer

Database Administrator

Developer

DevOps Engineer

Functional Consultant

Privacy Manager

Risk Practitioner

Security Engineer

Solution Architect

Student

Technology Manager

Azure

Do you need a clear path forward for your cloud journey? This learning path includes best practice guidance to help you create a cloud strategy, define a cloud adoption plan, prepare your cloud environment with proper governance, and implement cloud operations in alignment with your organizational needs. Cloud architects and IT professionals will learn and engage with the proven best practices, tools, and documentation in the Cloud Adoption Framework for Azure to build the technical knowledge needed to help your organization successfully adopt the cloud and meet business goals.

For additional learning on how to manage organizational alignment, take this learning module: [Use the Cloud Adoption Framework to manage organizational alignment](#).

This learning path helps prepare you for [Exam AZ-305: Designing Microsoft Azure Infrastructure Solutions](#).

Exams and Certifications

A Certificate of completion is issued at the end of the Course.

Schedule your Microsoft exam here: [Microsoft :: Pearson VUE](#)
